

Join us for a thoughtful evening honoring the many lives lost and those still suffering from the massive 9.0 Tohoku earthquake and tsunami in Japan on 3/11/11. The on-going accident and radiation release at the Fukushima Nuclear Power Plant has been a life altering experience for millions of people in Japan.

NO MORE FUKUSHIMAS

Saturday, March 10, 6:00pm
San Clemente Community Center, 100 Calle Seville

Our special guests, Mr. Hirohide Sakuma and Ms. Kyoko Sugawara, will share their personal stories about living through the disaster.

A new documentary, "Fukushima, Never Again" will be shown.

Pro-surfer and environmentalist, Kyle Thiermann, will inspire us with his unique perspective on nuclear power and abundant alternatives.

The evening will conclude with a candlelight procession, (flashlights for kids).

Gordon, MD, MPH

Fukushima Daiichi
 Still in full meltdown after March 11, 2011 disaster.

San Onofre Nuclear Generating Station
 (SONGS)

Shut down due to unexpected failure.
 > Near multiple fault lines and in Tsunami danger zone.
 > Worst safety record in the USA.
LOOK FAMILIAR?

Evacuation area – affects millions of residents and may turn this area into an uninhabitable zone.
